- **Database and other Tools** : SQL Server, Access, SQLHTML, XHTML, JavaScript, CSS, AJAX, LINQ, Reporting Services, MS Visio, MS Office. REST, CAML, SharePoint 2013/10/07, IIS, ADO.NET
- **Operating System** : Windows Server 2012/08/2003. PowerShell. Tools: SharePoint Designer, InfoPath, Visual Studio.

Work Experience

Senior SharePoint Developer

January 2011 F2 Systems, Llc

- Involved in all phases of Software Development Life Cycle (SDLC) - requirements gathering, analysis, design, development, testing, UAT, production and post-production support, and development of training materials. Worked with Share Point Object Model to build custom Content types, List definitions, Features and Web parts. Developed power shell scripts for installing and deploying solutions. Developed CAML and LINQ Queries to retrieve data from Lists and Libraries. Provide SharePoint technical guidance and support for various SharePoint sites/End users.
- Extensive experience in developing SharePoint Solutions using Visual Studio, SharePoint Designer and OOB features. Developed Sequential and State Machine workflows, Event receivers (synchronous and asynchronous events) and Timer Jobs to automate business process. Developed and deployed custom workflows using SharePoint Designer for notifications, approvals and taking feedback from users and also attached workflows to InfoPath forms to make them dynamic for data collection from users. Customized the look and feel - Branding and Navigation of Sites, Web Parts, Document Libraries, Lists, and Views. Developed dynamic InfoPath forms using rules and codes, created data connections to retrieve and submit data from/to SharePoint lists and other sources, published them as form libraries, content types and Administrator approved types. Developed powerful custom workflows using SharePoint Designer to automate business processes. Created Site collections and Sites using Publishing Templates and Team site templates. Developed and organized custom Content Types for SharePoint Lists and Document Libraries. Implemented external Content Types and Business Connectivity Services (BCS). Worked with version controller Team Foundation Server (TFS) for maintaining history of source-code and project documents. Experience in SharePoint out of the box features including forms, web parts, alerts, templates, content management, content types and workflows effectively. Implementation knowledge on CSOM, JSOM, and REST API services for SP 2013 and Office 365/SharePoint Online solutions. Experienced in web development using JQuery, HTML5, CSS3, XHTML, XML and XSLT.
- Environment: MOSS 2013/10, .Net Framework 4.5/4.0/3.5, ASP.NET, ADO.NET, C#, IIS, HTML, JavaScript, CSS, XML, XSD, XSLT, XML Web Services, Windows Server 2008/R2, MS Visual Studio 2013/10, SharePoint Designer 2013/10, InfoPath 2013/10, SQL Server 2008/R2.

SharePoint Developer

September 2008 to October 2010 Booz Allen Hamilton Inc.

- Involved in all phases of Software Development Life Cycle including requirements gathering, design, development, testing, implementation and post production support. Created team sites that use form web parts, content editor web parts, list web parts, image web parts for displaying information. Designed, developed, and published InfoPath forms to work with SP lists, libraries and forms, and attached it with workflow. Implemented Event Handlers for both synchronous and asynchronous events and registered to SP list. Implemented Data View Web part to import data and connectable web parts to exchange data between Web parts. Used BDC services to connect SQL data and display it in List. Provided Technical Support to end-users and resolved day-to-day issues regarding SharePoint usage. Customized SharePoint for including custom lists, Web Parts, themes and Custom Web site templates. Created DVWP to get data from database with help of sharepoint designer.
- Created SharePoint sites, lists and document libraries, look up list fields, custom views for document libraries applying sorting and filtering. Managed the user groups and assigned user roles and permissions on sites or lists.
- Environment: Microsoft Office SharePoint Server (MOSS) 2007, .NET Framework 2.0, ASP.NET, C#, HTML, CSS, XML, Windows Server 2003, MS Visual Studio 2005, SharePoint Designer 2007, Info Path 2007, SQL Server 2005.

March 2007 to August 2008 Bickford Senior Living

- Involved in requirements gathering and functional specification phases. Involved in development of UI (User Interface) Pages using HTML, Master Pages & ASP.NET Controls. Created Cascading style sheets (CSS) to attain uniformity through all pages. Used Validation Controls extensively for proper data input on web forms. Created tables, views, stored procedures using SQL Server 2005. Used JavaScript for client side validations. Used ADO.NET to communicate with SQL Server database. Used Data Grids, Data Sets, Data Readers and Data Adapters to extract data from backend. Developed webforms using Asp.net.
- Environment & Tools: ASP.NET, C#.NET, ADO.NET, Java Script, Visual Studio 2005, SQL Server 2005, HTML, CSS.

Education and Training

B.Sc : System , 2006 Addis Ababa University System

MSCE: Core Solutions of Microsoft SharePoint Server 2013 Â·MCTS: SharePointÂ® 2010, Application Development .
