- DB Client : SQL Developer 2000
- Experience working with the SVN repository and TFS.
- Technical Support
- Application LifeCycle Management
- Web Application Development

Education and Training

Master of Science : Computer Engineering University of Massachusetts City

Bachelor of Science : Computer and Electrical Engineering Nagpur University India

Northeastern University City , State Completed 1 semester as part of my MS program.

2019

- Certificate in Driving Digital Innovation Through Experimentation.
- Certificate in Platform Strategy for Business. ICAgile Certified Professional.

: Boston University

04/2021 Amazon Web Services : Certified Cloud Practitioner AWS

SENIOR SOFTWARE ENGINEER/ SENIOR ANALYST

Summary

Senior Software Engineer passionate about creating cutting-edge products for Enterprise level initiatives. Strong work ethic and dedicated to quality assurance. Adept at working with teams or independently in fast-paced settings. Proactive leader with strengths in communication and collaboration. Adept at managing concurrent objectives to promote efficiency and influence positive outcomes.

Experience

Booz Allen Hamilton Inc. - Senior Software Engineer/ Senior Analyst Annapolis Junction (304 Sentinel Dr) - Non Client Site , MD 07/2018 - Current

- Programmed applications and tools using C#/ ASP.Net using MVC and Entity Framework with goals of code abstraction, stability and reuse.
- Used variety of technologies, including ASP.NET, MVC, HTML5, JavaScript and SQL Server to create new applications.
- Successfully worked on full- stack development of projects (with tight deadlines since they were COVID initiatives). This required having to deep dive into SQL and backend work, writing stored procedures, and SQL queries.
- Co- supervised a 6-person team, discussed project roadblocks to drive issue resolution and promoted use of best practices.
- Reviewed project requirements to identify customer expectations and resources needed to meet goals.
- Established and maintained key relationships with business stakeholders to promote future opportunities.
- Leveraged Agile methodologies to move development lifecycle rapidly through initial prototyping to enterprise-quality testing and final implementation.
- Resolved customer issues by establishing workarounds and solutions to debug and create defect fixes.
- Identified opportunities for process improvements to decrease in support calls.
- Updated software upon release of vendor patches to mitigate vulnerabilities.

CVS HEALTH CORPORATION - Senior Lead IS Analyst/ Store Systems Developer City , STATE 02/2014 - 06/2018

- Handled all delegated tasks, including developing and building apps using C and C#. These apps greatly facilitated store employees in their day to day tasks of replenishing inventory.
- Made sure that code being implemented was to specifications and Business requirements. Assisted in regression testing and helped fix issues that came up in testing.
- Created agendas and communication materials for team meetings.
- Provided IT and software trouble-shooting support to rest of the organization.
- Developed and managed project plans while providing status updates to management.
- Developed validation test plans and test scenarios to prove correctness of the design.
- Performed Unit testing and assisted in thorough regression testing to cover any real-time issues that came up.
- Acted as a Business Analyst and effectively led discussions with the Business to get requirements and specifications.
- Worked on re- writing Apps to fetch data from SQL tables instead of Database files.
- Re- designed apps that are used by CVS systems to fetch data from SQL tables, resulting in better system performance and robustness.
- Was able to deliver SQL work with quick ramp up time.
- Performed regression testing, and assisting in quick turnaround for issues that come up in CVS stores.

CVS HEALTH CORPORATION - Application Developer City , STATE 07/2012 - 02/2014

- Part of a team working on RF apps that are used by stores for their inventory and replenishment systems.
- Participated in design sessions, and assisted in designing various application programs using C.
- Helped design, develop and implement C # programs that are used for the front end of the RF guns used in stores.
- Helped coordinate Business requirements with my team to ensure requirements were accurately implemented.
- Helped in QA regression testing, to ensure end product met business standards and requirements.
- Proven record for quick ramp up time, when asked to implement SQL methodologies as part of revamp of RF guns.
- Proven record for quick ramp up time when implementing Java code for CCP applications.
- Proven record for quick turn- around time for issues reported by stores, have been able to effectively escalate issues where needed to get quick resolution, hence causing minimum loss to stores.

Additional Information

- ACHIEVEMENTS , Awarded special mention and certificate for successfully helping in transitioning Navarro stores to CVS stores.
