

TEAM LEAD

Summary

Motivated Team Lead possessing excellent leadership and planning abilities. Focused on delivering high-quality products and encourages teammates to improve skills and meet demanding targets. Maintain high standards of software quality within the team by establishing good practices and habits. Identify and encourage areas for growth and improvement within the team.

Skills

- 11+ years of professional experience with Java and JavaEE
- 7+ years of experience with JSF, Primefaces, Servlet, JSP, JavaScript, Spring, Mybatis, Struts2, MySQL, Oracle, SVN, CVS, Glassfish, Tomcat, JSON, Junit, HTML5, JDBC, SQL, agile development methodologies
- 3 years of experience with Hibernate, EJB, REST Web Service, XML, JMS, Linux, GIT, SpringBoot, Kafka
- 2 years of experience with NodeJS, Express, React, Redux, MongoDB, Html5, Webpack, OnsenUI
- 1 years of experience with Apache Solr, Gradle

Experience

The Body Shop | Eugene , OR Team Lead 05/2019 - Current

- Analyze the client requirements, research and evaluate the solutions.
- Collaborate with software architects to plan and design application. Create concept document with detailed design objectives and developed architectural and system design documents and db design document for ARB to review.
- Communicate and collaborate with other teams to do estimation, create user stories and tasks, and develop the work plan.
- Provide technical leadership to teammates through coaching and mentorship.
- Guide team development efforts towards successful project delivery for each milestone. Collaborate with other software developers to develop, test, and maintain design, develop, and unit test applications in accordance with established standards. Participate in peer code review.
- Prepare demo, configuration document and other documentation on the status, operation and maintenance of software.
- Merge branches and support OA team deployment of releases .
- Support QA to perform functional, non-functional, regression and performance tests for updated systems.
- Support production issue, provide solutions and coding fixes for software problems.

Panjiva | Virtual , MT Software Developer II 09/2016 - 04/2019

- Design and implement iOS and Android app with NodeJS, React, Redux, OnsenUI, webpack, Babel, html5, CSS, Javascript es6.
- Design and implement Carrier software and Dispatch management software in Java using JSF, Primefaces, Spring, Struts, iBATIS, Apache Solr.
- UI development using JSF and Primefaces.

Morgan Stanley | Clayton , NC Java Developer 07/2013 - 09/2016

- Design and developed B2C and B2B custom applications in Java using JSF, Primefaces, Spring, Struts, iBATIS.
- UI development using JSF and Primefaces, html5.

Education and Training

Clemson University | City , State Master of Science in Computer Science 05/2013

University of Science And Technology of China | City Master of Science in Software Engineer

Dalian University of Technology | City Bachelor of Science in Software Engineer 05/2010

Additional Information

Projects:

5/2019-Present Frontier, API Service, Kafka Service, Callback Update Service

- Lead the team to design and implement multi applications system.
- Frontier is the web portal, include letter builder, letter sender, template design, delivery tracking, approval, User Administration, Rapid Campaign modules. It's implemented by Java, JSP, SpringMVC, Mybatis. It's using Glassfish web Service, and SVN for version control.
- API Services is a web server provides alert functionalities, while allow client to send request to out API Service endpoints. It's implemented by Java, Springboot, Jersey, mybatis and SVN for version control.
- Kafka Services is a multi client web service provides external server communication functionality. When it receive the request from other service, it will send email to mailgun, or SMS to Twilio, or Notify to Twilio. It's implemented by Java, Springboot, mybatis, Kafka, and SVN for version control
- Callback Update Service is service provide webhook endpoints to the external service. It's implemented by Java, Springboot, mybatis.

3/2018-4/2019 Html5driver & Gateway

- Design and implementation of iOS and Android Carrier management app, including tracking tools, mapping, shipment tracking, driver GPS location tracking, signature capture.

- Using the NodeJS, MongoDB for the backend development.
- Use the React, Redux, OnsenUI for the UI development.

9/2016-3/2018 Ascend

- Design and implementation of Carrier and Dispatch management system. Including tracking mapping, route planning, stops management, and dashboards dispatch management.
- Use the JSF, Spring, Mybatis, Apache Solr for the backend development.
- Use the JSF and Primefaces for the UI development.

12/2015-9/2016 PDFScrubber System

- Lead the team to design and implement a PDF analysis and optimize application. This is an internal used PDF analysis and optimize tool.
- Integrate EJB for the bean management.
- Use the JSF and Primefaces for the UI development.
- Using the Apache thrift creating services between C++ service and the Java app.

1/2016-2/2016 Sales Recommendation System

- Participate the design and implementation of the SRC system. It will use the clients existing data and the ratings to recommend the top sales stuff to the client as a dashboard, and show the analysis result to the client, for example the monthly, quarterly and yearly sales charts.
- Use apache spark to analysis the client's invoice and payment Data.
- Use c3js to implement the payment chart.

5/2014-1/2016 EIPP

- Implementation of the B2B Invoice payment management system. Including user information management, wallet management, onetime payment management, scheduled payment management, statement management, invoice dashboard, invoice details management.
- Use the Java, Struts2, Spring, Mybatis, JSF, Primefaces, REST web service, Glassfish, Oracle database

7/2013-5/2014 Sunrise

- Implementation of the B2C invoicing web application. Including user information management, wallet management, onetime payment management, scheduled payment management, statement management, messages management.
- Use the Java, Struts2, Spring, Mybatis, JSF, Primefaces, REST web service, Glassfish, Oracle database.

10/2009-10/2010 Internship in FineReport, INC. and Focus Technology Co., Ltd.

1/2007-9/2009 School projects using Java or C++ with Oracle/ MySQL and struct, spring
