

## SENIOR SOFTWARE DEVELOPER

### Summary

- Oracle certified Java Professional with over 8 years of experience in analysis, design, development and implementation of SaaS, Enterprise and web-based internet/intranet applications using Java/J2EE and related Technologies.
- Certified AWS Architect/Developer with hands on experience in building cloud solutions.
- Hands on experience in building middleware and service based applications using Apache Solr, EJB 3.0, JMS, JBoss, SOA.
- Showcased exceptional troubleshooting skills during 3rd party integrations like Signiant FIMS, Oracle Agile PLM and STRATA.
- Hands on experience in building interactive rich front-end applications using EXT-JS 3.0/5.x, JQuery, XHTML, CSS, JavaScript, AJAX and Tag Libraries.
- Demonstrated excellence in delivering quality software products in Iterative and Agile SDLC environments.
- Excellent team player with strong analytical, organization and communication skills.

### Highlights

- Java
- Methodologies
- Agile
- J2EE Technology
- Servlets, JDBC, EJB 3.0, JAAS, JNDI, JMS, Java Mail, Quartz
- Web Technologies
- JSP, JSTL, EXT-JS 3.0/5.x, JQuery, JavaScript, AJAX, JSON
- Frameworks
- Struts 2.0, Spring 3.0
- ORM Frameworks
- Hibernate 3.x, JPA
- RDBMS
- Oracle 10g/11g/12g, MS SQL, MySQL
- Search Engines
- Solr 4.7.0
- Scripts
- Shell (Bash)
- IDEs
- Eclipse, BEA Workspace Studio 1.1, MyEclipse 8.0
- TOAD, SQL Developer, Squirrel
- Web/Application Servers
- BEA Weblogic Server 10.0, Apache HTTP Server, JBoss
- WebServices
- SOAP, SOAP UI, XML, WSDL, XSD, JAX-WS, JAXB, REST, JAX-RS,
- Jersey, JSON, Apache-CXF
- Version Control
- Subversion (SVN), Perforce
- Testing/Logging
- JUnit, Log4j
- Build Tools
- Apache ANT, Maven
- Bug Tracking
- Bugzilla, JIRA
- Operating Systems
- Windows, LINUX

### Experience

09/2014 to 02/2017

Senior Software Developer Logic20/20 1/4 Dallas, TX

- ESPN, is the worldwide leader in sports, it's a global cable and satellite television channel. The channel focuses on sports-related programming including live and recorded events telecasts, sports news and talk shows, and other original programming.
- Gather, document and analyze new business requirement.
- Developed an index based search and suggestion component using Apache SOLR.
- Solr documents were created and updated at regular intervals using SOLRJ and DIH, data were imported from oracle data source and other restful services.
- Hands on experience in WSO2 ESB middleware core development.
- Designed and developed various orchestrations for different business process using WSO2 ESB.
- Integrated different nodes, end systems and legacy systems with WSO2.
- Developed storage nodes using EJB 3.0, JMX and JMS to maintain media files and transfer files to various location using FTP.
- Developed middleware application using SOA to integrate various nodes with other external systems, services were exposed using JAX-RS

and messaging handled by JMS.

- Designed and developed a full tier web application using EXT JS 5.0, JAX-RS Services and SOLR.
- Developed and performed effective unit tests using JUnit.
- Effective team player, involve in daily standup meetings, constant interaction with business users, testing teams to gather enough information before any assignments.
- Environment: JAVA/JEE, WSO2 4.6.0, EXT JS 5.0, SOLR 4.7.0, JBoss EAP 5/6, JMS, EJB3.0, Oracle11g, SOAP,XML, JAX-WS,JAX-RS, Quartz, TOAD, SQL Developer, MySQL, Eclipse, FIMS 11.2.

04/2014 to 09/2014

Senior Java Developer Deloitte 1/4 Minneapolis , MN

- Genesys is the global multi-channel customer experience and contact center solution leader.
- It's a leader in providing IVR solution to a cross variety of domains like healthcare, banking and financial services.
- Soundbite Engage is the name of the product and it's a multitier application with a latest technology stack.
- Gather, document and analyze new business requirement.
- Developing new extension services using JAX-WS and enables it to our new customers.
- Developing new features in the existing product as per requirement.
- Enhancements are done using front-end technologies like JQuery and Struts 2.
- Developed and delivered SOAP based Web Services for our new clients used Apache-CXF and SOAP UI to test the services.
- Transaction management and other database operations are leveraged into Hibernate3.0 and custom Persistence framework.
- Worked on design patterns like Singleton, Facade, and Factory method for application development.
- Developed and performed effective unit tests using JUnit.
- Adaptive and effective team player, proven my abilities in analyzing and resolving production issues.
- Impact Analysis Document are written when a new feature or a Fix is done in the existing product.
- Environment: JAVA/JEE, JSP, Struts 2, jQuery, Hibernate, JBoss, Eclipse, Oracle11g, SOAP,XML, JAX-WS, RESTful, JAXB, Apache-CXF, Quartz, TOAD.

05/2012 to 04/2014

Senior Java Developer Deloitte 1/4 Phoenix , AZ

- Bally Technologies is a diversified, worldwide gaming company that designs, manufactures, distributes, and operates gaming devices and computerized monitoring, accounting and player-tracking systems for gaming devices.
- Oracle's Agile Product Lifecycle Management enables you to strategically manage the complete lifecycle of a product from the ideation phase through to recycling and retirement.
- Building custom application to the End Business User through Process Extensions.
- SOA solution to integrate various end systems like SCM, Siebel, Agile and .NET systems.
- Building enterprise applications to Business Users like Compliance Team.
- Gather, document and analyze business requirement.
- Developed custom Agile Process Extensions to cater new business requirements and has used Agile Java SDK and Agile functionalities extensively to meet various business requirements.
- Developed Web Applications with rich UI using CSS, JavaScript, Ajax, jQuery plugins and Struts 2 framework.
- Developed the Authentication and Authorization using Struts Interceptor.
- Developed Windows Authentications using JCIFS.
- Developed Middleware application using SOA focused to integrate 2 end systems Siebel and Agile through messaging system JMS and an UI was built on top of it to track the transactions between the systems and to repost the failed transactions.
- Developed and delivered SOAP based Web Services which perform various business logics in Agile PLM and send the result to the .NET and Siebel system.
- Developed and delivered RESTful service to access utility data's quickly.
- Leveraged Hibernate great features such as transaction management, transparent data persistence, object/relational mapping, and hibernate query language.
- Worked on design patterns like Singleton, Dependency Injection, Facade, and Factory method for application development.
- Worked on Apache POI to generate reports in Excel.
- Worked on Open Office and iText to generate PDF document for the compliance team at runtime from a give word template.
- Developed cron jobs to maintain data integrity between Agile PLM, Artemis and Mapics database.
- Developed job schedulers using Quartz Scheduler.
- Developed and performed effective unit tests using JUnit.
- Implemented best practices and development standards.
- Trained on Hadoop Eco System.
- Developed a POC to demonstrate working prototype of Hadoop Eco System, making use of Map Reduce programming, Pig and Hive.
- Environment: JAVA/JEE, JSP, Struts 2, jQuery, Hibernate, JBoss, MyEclipse, Oracle11g, MS SQL, EJB 3.0, JMS, SOAP,XML JAX-WS, RESTful, JAXB, Quartz, Apache POI, Open Office, iText, Oracle Agile PLM.

06/2010 to 05/2012

Senior Java Developer Deloitte 1/4 Miami , FL

- Technically, Scorpion is a multi-layered EJB web application.

- It has three major functional components - Ordering, Labeling and Reporting.
- It allows External/Internal facilities to place orders for test with Spectra Labs.
- It generates labels with unique accession number which is pasted on to the test sample container which contains the sample drawn from patient.
- Finally the facility can view results of the patient for various tests performed and generate a comprehensive report.
- Involved in a team for designing and developing technical documents that comprised of architecture designs, technical descriptions, and business logic illustrations in ER, class and sequence diagrams.
- Developed the JAVA Reporting Component using SAP provided JAVA API's which interacts with the SAP Business Object Crystal Reports and render the report in JSP.
- Developed the JAVA component for Report Designer which interacts with SAP BO Infoview and allows the user to create custom crystal report/template with desired prompts, look and fields from JSP and save the report into BO CMS.
- Developed the application Authentication and Authorization using JAAS.
- Developed web Components using JSP, Servlets and Server side components using EJB under J2EE Environment.
- Developed the patient profile module (Server & Client side) of the application using Spring MVC and IOC and used Hibernate for ORM.
- Developed a rich and interactive UI using EXT-JS and implemented Web 2.0 features with Auto completion feature, Drag and Drop functionalities using widgets and AJAX framework.
- Developed Java API's as Web Services to other 3rd party applications.
- Handled Configuration Management of the entire project, developed Maven build scripts for creating artifacts and deploying the same in Linux Environment.
- Configuration of BEA Weblogic Clustering in Linux Environment for load balancing.
- Configuration of Apache Proxy Server to overcome the license limitation in BEA Weblogic Application Server.
- Prepared IAD documents for new requirements.
- Executed PMD, Findbugs and Checkstyle to adhere the quality of code.
- Prepared Junit test cases for the application.
- Environment: JAVA/JEE, JSP, EJB, Spring, Hibernate, Ext JS, AJAX, BEA Weblogic Server 10.0, Eclipse IDE 3.1, Web Services BEA WorkspaceStudio 1.1, SQL Developer, TOAD, Oracle 10g, Ant, Maven, Checkstyle, PMD, Findbugs, JUnit.

03/2008 to 06/2010

Java Developer Performix 1/4 Marlborough, CT

- Cricket Wireless is a telecom company providing services to approximately 4.6 million subscribers in the United States Infinisys Rating and Billing System (IRB) is the new billing system aimed at replacing the existing billing system.
- The look and feel of the existing application was changed completely to give a rich UI experience.
- Designed dynamic and functional front-end in CSS, JavaScript, JSP, and JSTL.
- Implemented Singleton, Factory, DAO and Filter design patterns for the application development.
- Implemented MVC Architecture.
- Worked with UX Designer and Re-engineered multiple small applications.
- Used SVN for version controlling tool.
- Tracked bugs through Bugzilla.
- Developed and performed effective functional tests using JUnit.
- Involved in maintenance and enhancement of the application Environment: Java/J2EE, JDBC, Servlet, JSP, AJAX, jQuery, JBoss, MyEclipse, Oracle 10g, Log4J.

06/2006 to 03/2008

Junior Java Developer Caci International Inc. 1/4 Forest Heights, MD

- Enterprise Rx application enables the pharmacy store to fulfill the prescription.
- Admin Tool is a utility developed to minimize the deployment effort of Enterprise Rx.
- Developing End-User friendly GUI using JSP, HTML, DHTML, Javascript & CSS.
- Implemented MVC design pattern using Servlets, Java Beans and JSP.
- Used various Core Java collections framework (JDK 1.5) to build up application.
- Applied OO Programming concepts like Polymorphism and Inheritance to improve the existing Java/JEE based code base.
- Applied design patterns like Factory pattern, Singleton and DAO effectively.
- Involved in maintenance and enhancement of the application.
- Writing complex & cross browser Javascript to validate the web pages.
- Analyzed and documented the business requirements of the customer.
- Prepared Junit test cases for the application Environment: JAVA/JEE, JSP, Servlets, JavaScript, Oracle 9i, Log4J, JBoss.

## Education

Bachelor : Engineering with Computer Science Engineering with Computer Science Oracle Certified Java Professional. \*Workshop on Agile Framework with Rally Tool. \*Trained on Ensemble Production with HL7 v2010.1. \*Trained on Big Data Hadoop, Map Reduce, Hive, Pig.

Skills  
.NET, accounting, Agile, AJAX, ANT, Apache, API, application development, Artemis, banking, Bash, Big Data, Billing System, business process, cable, Clustering, CMS, Configuration Management, Crystal Reports, crystal report, CSS, Client, clients, Version Control, DAO, database, designing, DHTML, Eclipse, EJB3.0, EJB 3.0, EJB, XML, features, financial, FTP, functional, Genesys, GUI, UX, HTML, HTTP, IDE 3.1, IVR, J2EE, Java, JMS, JSP, Java Beans, JavaScript, JBoss, JDBC, JNDI, JQuery, JSON, LINUX, Log4J, Logging, logic, Mapics,

meetings, messaging, access, Excel, Mail, Office, Windows, 3.x, word, Middleware, MVC, MySQL, Enterprise, OO, Search Engines, Operating Systems, Oracle9, Oracle, Developer, PDF, PLM, Programming, Proxy Server, quality, RDBMS, Reporting, requirement, SAP, s as, Servers, Servlet, Servlets, Shell, Scripts, Seibel, Siebel, SOAP, MS SQL, SQL, Struts 2.0, Struts 2, Struts, team player, telecom, television, TOAD, unique, view, Web Applications, web pages, Weblogic, BEA Weblogic Application Server, written
