Professional Experience

Tiaa Ann Arbor , MI Vice President - Services 01/2013 to Current â— Architect and implement Data Warehousing solutions using SQL Server Analysis Services using Multi-Dimension or Tabular models based on the environment requirements. â— Architect and implement ETL processes using SQL Server Integration Services. â— Oversee implementation as team lead to ensure all business, functionality and technical goals are met as part of the deliverables. â— Assist engineers where-ever required to help meet timeline and customer satisfaction. â— Evangelize AOS solutions and methodology by hosting monthly webinars, community events, and technical conferences for our customers. â— Managed our delivery team by ensuring that they are sufficiently equipped to handle assigned projects by mentoring, training and goal oriented evaluations. â— Managed customer's relationship by ensuring that we are delivering SharePoint, SQL Server and Business Intelligence Solutions as per requirements and also mitigating any customer satisfaction issues. â— Entrusted on keeping our business unit profitable by engaging customers in upsales, next-sales and x-sales for the entire AOS services portfolio as well as getting new customers. â— Assisted delivery team with projects to help speedup implementations and engagements as well as to control customer's budget.

Kratos Defense And Security Alexandria , VA Principal Consultant/Co-owner 06/2008 to 07/2011 â— Architecture Business Intelligence, SQL Server and SharePoint Solutions based on customer requirements. â— Collect the requirements by interacting with different stake-holders in order to solidify the design. â— Oversee implementation as team lead to ensure all the business and design goals are met as part of the deliverables. â— Conceptualized, architecture and designed applications that would tie to our customers applications to help streamline their business. â— Managed our off-shore development team implementing our applications to ensure they exceed standards and are easy to integrate. â— Evangelize eTek Global solutions and methodology by hosting community events, and technical conferences for our customers. â— Assisted engineers whenever required to help meet timeline and customer satisfaction. â— Managed customer's relationship by ensuring that we are delivering SharePoint, SQL Server and Business Intelligence Solutions as per requirements and also mitigating any customer satisfaction issues.

Kratos Defense And Security Dallas , TX Sr. Database Administrator 06/2006 to 09/2008 â— Technical lead in SQL 2005 migration for our SQL 7/2000 SQL servers. Task included indentifying the database usability to determine the final destination on the SQL 2005 environment, Migrating and re-writing the DTS packages to SSIS packages to take advantage of SSIS features. â— Installed, configured and maintained three SQL 2005 cluster servers to provide 99.9% hardware uptime. Configured and maintained Database Mirrors to provide a redundant database environment for the critical databases. â— Technical lead in MOSS 2007 environment, tasks included installing, configuring and maintaining enterprise SharePoint Portal for intranet and extranet purposes. â— Created site definitions to provide reusable templates that can be re-used in departmental team sites within the enterprise. â— Created multiple SharePoint Designer workflows to ensure efficiency within the corporate environment. â— Installed configured and provided reports from SSRS to the corporate executives for different management applications. â— Involved in over 180 corporate websites maintenance, tasks includes front-end and back-end server's maintenance, web sites monitoring using Microsoft Operations Manager 2005 to ensure websites uptime.

Stanley Black & Decker, Inc. Kernersville , NC Web Master / DBA 11/2004 to 06/2006 â— Technical lead in SQL 2005 Server migration from SQL 2000 for our development network, tasks included database migration, DTS packages migration, sprocs and other SQL elements to ensure compatibility with our applications. â— Installed, configured and maintained SQL Servers tasks included backup/recovery, performance and tuning, load balancing and clustering to ensure 99.9% uptime systems availability. â— Involved in SQL programming tasks included creating DTS packages, Log shipping and stored procedures to ensure applications integration and ease of data shipment. â— Developed Web and Web Solutions using ASP.Net 1.1 and 2.0, Visual Studio 2003, 2005 and ADO.NET tasks included integrating the applications with Active Directory, Databases, XML, and other data sources. â— Installed, configured and maintained MS Sharepoint Portal Services and windows sharepoint services (WSS) in both Intranet and Extranet environments, task included writing webparts that meets user's needs integration with MS Office. Provided InfoPath capability through Sharepoint to ease forms creating and submission through out the firm. â— Configured and Maintained MS Application Center to provide 99.9% uptime systems availability through Clustering and Load balancing for our Web Servers and Web Applications. â— Technical lead in Security Assessments of our Web Servers, SQL Servers and Active Directory to identify and resolve security vulnerabilities â— Maintenance of Corporate Web, SQL and File Servers in both intranet and extranet environments.

JESSCOM INC City , STATE Systems Administrator 10/2003 to 11/2004 â— Maintain SQL Server 2000 databases, tasks includes managing backups, creating and managing stored procedures, views and triggers, server tuning, automation of administrative tasks, user and security management, database optimization and determining common performance problems and QA. Maintain enterprise-wide SQL Servers and Access Databases. â— Technical Lead in SQL Server production systems maintenance, tasks includes DTS packages maintenance, Replication between distributed systems supporting different clients within the country. Built SQL jobs and database maintenance plans for proactive management and notification. â— Involved in development of ASP.Net, VB.Net, and ADO.Net and Microsoft Web Services deployment applications. Deployed Microsoft Solutions Framework (MSF) as a preferred innovative technology solutions â— Installed and implemented Clustering and Load Balancing to ensure 99.9% uptime systems availability for our managed hosting. â— Responsible for new development, deployment, troubleshooting, service packs, and hot fixes, along with full production support, this involved IIS 2003 Deployment, Monitoring and Security. Implementing and maintain internet radio streaming servers and web servers to integrate with SQL server for easier song track and artist

information access for the radio stations this involves ASP databases and MS Application Center server running on Windows 2000 Advanced Server. â— Implementing and maintaining different mail servers including Exchange Server 2003, IceWarp Mail Servers and Seattle Lab Mail tasks included creating user account maintaining user's permissions and Security Integration. Designed, Installed and configured DMZ for internal network protection, Maintained corporate firewalls, routers and VPN tunnels

DST Systems Inc City , STATE Systems Administrator 07/2002 to 07/2003 â— Designing, implementing and maintaining SQL Server 7.0/2000 databases, task included managing backups, creating and managing stored procedures, views and triggers, database replication, server tuning, automation of administrative tasks, user and security management, database optimization and determining common performance problems. â— Supported user's workstations and servers tasks including installation and repair of Desktops and Laptops, LAN / Mainframe Printing Laser Printers, Palms devices. Installation and configuration of MS Back Office, Adobe Products, Symantec Products and GE Core load Applications. â— Performed Desktop Support technician tasks including workstation administration involving installations, configurations, and maintenance of DST applications and products including TA2000, Encorr, and e-proxy products. â— Hands-on support of complete corporate infrastructure. Installed, configured and administers Microsoft Windows NT4 /2000 Servers and Win 2000 Advanced Servers. Integrated Novell Netware with NT/2000 desktops for over 500 persons. Responsible for architecture planning, implementation, and support of infrastructure systems. Knoxville College City , STATE Systems Technician 11/2000 to 05/2002 â— Installed and administered Microsoft SQL Server 7.0/2000. This included Setup of stored procedures, triggers and User Permissions. â— Worked with Windows 2000 Server viz. user Manager, TCP/IP, Printing, DNS, WINS, DHCP Server and Hardware (i.e. .Nics, Memory, and Processors etc.). Installed, Configured and troubleshoot Windows 95, 98, NT, 2000 Pro and XP. â— Ensured 24/7 Network Availability. Tasks included Monitoring Cisco 4000 Routers, Cisco Switches, Ethernet Connections and general Network Wiring. Actively involved in cat5 cable termination and crimping at new sites and for maintenance purposes. â— Managed Network Address Translation tasks included installation and implementation of NAT and ICS on a LAN connection. Directly supported schools DMZ and firewalls to ensure Network and data protection.

Education

Bsc. : Technology 2013 University of , City , State , US 2013 â€“ Microsoft Certified Technology Specialist (MCITP). SQL Server 2012 2012
â€“ University of West Alabama Bsc. Computer Information Services.

Computer Science 2002 Knoxville College 2002 - Knoxville College Computer Science

Diploma : Computer Science 1999 ACK Computer College 1999 - ACK Computer College Hold a Diploma In Computer Science.

Certifications

MCSA Microsoft Certified Database Administrator MCDBA Microsoft Certified Systems Administrator Microsoft certified professional
Microsoft Certified Technology Specialist (MCITP) Microsoft Certified Technology Specialist (MCTS)

Presentations

Evangelize AOS solutions and methodology by hosting monthly webinars, community events, and technical conferences for our customers
