Experience

Web Developer

February 2016 to April 2016 22Nd Century Technologies i¼ Anaheim , CA

- Appreciated by the Director for developing single handedly federal government funded SmartCouples project's website and delivery within 4 months timeline.
- Collaborated with designers and product analysts to create and implement clean interfaces and simple, intuitive interaction and experiences.
- Oversaw scheduling of project milestones and coordinated with Director on any proposed changes or challenges to be overcome.
- Provided guidance to other team members and management on various technical aspects to accelerate the process of product development and establish the purpose of website based upon its target audience.
- Optimized web assets for optimized speed and performance.
- Ensured the website has a consistent feel and look throughout all web properties by utilizing high quality cross-browser compliant CSS and JavaScript.
- Overcame various technical challenges to integrate custom requirements with Terminal Four platform.

Web Developer

September 2015 to December 2015 22Nd Century Technologies i¼ Arlington , TX

- Single handedly developed a promotional website which helped David Blackburn to reach out to masses and establish web presence.
- Performed all requirements gathering and analysis, prepared documentation, carried out all project phases.
- Involved writing cross-browser compliant CSS and JavaScript.
- Coded for third party integration with social networking websites like Tweeter and Tumblr as per custom requirement.

Business Analyst Intern

June 2015 to August 2015 Corptax i¼ Washington , DC

- Performed in-depth data analysis on business critical data, in R language, to generate insights with the help of visualization which accelerated the process of decision making for management.
- Streamlined log generation and handling process by recognizing data patterns and aligning them with Splunk tool, making Querying and Visualizing billions of logs more effective for business intelligence.
- Selected one of the top three people out of pool of 15 interns who got an opportunity to be sent at cosmetic headquarters of Johnson and Johnson, a prime client at L&T.
- Attended marketing and product meetings at Johnson and Johnson to get in sync with their current product line-ups and customer pain points for the same, for which we later analyzed their social networking data and product visibility utilizing Cloudera Hadoop and Impala that majorly helped them to reprioritize their product line-up.
- Responsible for implementation of data intensive near real-time dashboard which highlighted key business metrics at Johnson & Johnson.

Full Stack Developer

January 2014 to June 2014 Accenture Contractor Jobs i¼ North Las Vegas

- Handled a social networking project from ideation to implementation which involved front-end and back-end web development utilizing my skills in PHP, MySQL, CSS3, HTML5.
- Created pixel perfect web pages utilizing HTML, CSS, JQuery from PSDs of Yahoo like websites.
- End-to-end E-commerce development from scratch providing classes and APIs for further improvisation, extension and re-use in current and upcoming E-commerce projects for the company.
- Coordinated with cross-functional teams to ensure budgetary and time constraints were fulfilled.
- Participated in requirement elicitation, designing, and development of WordPress website for a client, leading lifestyle club, providing an ERP like solution for club members wherein they could pay for membership extension, register for amenities usage, etc which reduced the club's operational expenses overhead by around 40% and increased club's visibility by over 30%.
