NSIC, National Small Industries Corporation, ORACLE - Reporting Consultant  
City, STATE 11/2006 - 02/2008

- CRYSTAL REPORTS
- Worked on MIS module in EDP Department
- Worked extensively on generating Crystal reports based on different schemes and regional office
- Worked extensively on reports, which involved crosstabs, Drilling requirements, Slicing and Scope, and analysis
- Developed complex reports in WEBI involving Cross tabs, Sub Queries, etc
- Troubleshooting of various UAT & Production issues that aroused during migration of reports & universe
- Created developer guide documentation to help clients maintain the universes and reports
- Involved in user training and helped to involved intensively in the development of the Ad-hoc universe
- Updating the universe with new changes to be in sync with the data models, replacing existing derived tables with new tables for better performance and standards
- Created hierarchies and derived tables where every required in the universe

Mapped current business and operational processes and recommended areas for improvement

- Overhauled operational workflow to launch Manufacturing Reporting system into new processing platform
- Devised Manufacturing Reporting automated scripts used by developers in managing SQL systems to improve performance
- Mapped process activities to identify shortfalls and propose options to rectify operational inefficiencies
- Established an online configuration knowledge base to support functionality by developing a robust system application overview
- Developed metrics derived from raw company data to track improvements in organizational efficiency
- Researched and compiled tailored monthly analytics and reports for senior management with Manufacturing Reporting.
- Diminished process gaps and encouraging optimal productivity by closely supervising the workflow of claims analysts and mail clerks
- Optimized system and platform performance capabilities in the most efficient, practical way possible
- Created workflow diagrams and Gantt charts to demonstrate processes and timelines
- Collaborated with Manufacturing Reporting departments to respond to questions and concerns regarding project details
- Provided Manufacturing Reporting operational support for high-volume financial institutions in the fast-paced 24-hour work environment
- Increased annual revenue by 8 % by recommending improvements in Manufacturing Reporting efficiency
- Reviewed files, records, and other documents to obtain business information and key data informing responses to development requests
- Collaborated with team members to achieve target results
- Worked with customers to understand needs and provide excellent service
- Used coordination and planning skills to achieve results according to the schedule
- Increased customer satisfaction by resolving issues
- Led projects and analyzed data to identify opportunities for improvement
- Worked to maintain outstanding attendance record, consistently arriving to work ready to start immediately
- Overhauled operational workflow to launch Report into a new processing platform
- Devised Report automated scripts used by developers in managing Reporting systems to improve performance
- Established an online configuration knowledge base to support functionality by developing a robust system application overview
- Developed Reports metrics derived from raw company data to track improvements in organizational efficiency
- Researched and compiled tailored monthly analytics and reports for senior management with reporting
- Diminished process gaps and encouraging optimal productivity by closely supervising the workflow of claims analysts and mail clerks
