Experience

12/2015 to Current
Java/J2EE Developer Synechron Inc - Harrison , NY

- UPS) is the world's largest package delivery company and a provider of supply chain management solutions.
- The Operations Label and Forms Service (OLAFS), a Windows based Web Service where clients will request for a label/form via a SOAP-based interface.
- The service will be deployed on a Windows 2008 server with IIS and will be available to internal clients.
- OLAFS will leverage an existing label printing component (FOSS) and report designer (Microsoft Reports) for forms.
- Labels will be available as EPL2, ZPL2, PNG, GIF, JPEG, or PDF files.
- Forms will be available as PDF, Excel, or TIFF files.
- It will handle URC and Maxicode Compression and will support 4x6, 4x8, 2x4 label formats.
- It will support multiple languages.

03/2014 to 11/2015
Java/J2EE Developer Synechron Inc - Jersey City , NJ

- The Barclays Capital Aggregate Bond Index is a Market Capitalization-weighted index, meaning the securities in the index are weighted according to the market size of each bond type.
- Most U.S.
- traded investment grade bonds are represented.
- The Price Challenge System is a real-time web application used by the Index Production and Index Pricing Teams of Barclays Risk Analytics & Index Solutions(BRAIS) group.
- It provides a single user interface for the production and pricing teams across the globe to capture the price challenges received from clients, record the resolutions provided and communicating the resolutions back to the clients.
- The recorded information is available in the form of Reports and Statistics, thus providing a summary of the data useful for senior management reviews and audit requirements.
- Essentially, it eliminates a lot of manual inefficiencies in the day to day activities of the users involved in recording, evaluating,validating, resolving and responding to the price challenges raised by clients.
- It is tightly integrated with several other BRAIS systems and augments the index solutions, workflow.
- In this regard, it is one of the mission critical applications for the BRIASgroup.

06/2013 to 02/2014
Java/J2EE Developer Synechron Inc - Plano , TX

07/2009 to 05/2010
Software Engineer Nortonlifelock Inc. - AZ , State

- Web Applications most targeted for the intruders to compromise because everything that is supposed to be confidential, exposed to the internet.
- This can be avoided by doing the same as what the intruder tries to do as an initial step to identify the confidential files saved on the web

server.

- Rather, it also lists out the available URL's which the application uses or has as a part of the Web Application.
- A Bot is designed for the targeted work and so this Bot tries to crawl the whole website just by taking the main URL as an input and lists all the pages or things, which it's getting connected to.

Education
2012
Masters : Computer Technology Eastern Illinois University USA GPA: GPA: 3.1/4.0 Computer Technology GPA: 3.1/4.0
2010
Bachelors : Computer Science and Information Technology, JNTU India Eastern Illinois University GPA: GPA: 3.4/4.0 Computer Science and Information Technology, JNTU India GPA: 3.4/4.0
