Accomplishments

- Developed some of the top-requested features in our software-as-a-service web application, greatly enhancing customer retention and satisfaction
- Advised team leaders on several key steps of the project management process drawing on my own experience and education
- Initiated the UX/UI design on the new "Military And Veterans Resource Center" website, which was later accepted as the basis for the current design.

Work Experience
eCommerce Web Developer
October 2016 to November 2016 Siteone Landscape Supply, Inc. ï¼ Charleston , SC
(Laid off due to workforce reduction).

- Helped maintain and enhance a custom eCommerce platform built on the Zend 1 Framework
- Attended ZendCon 2016, greatly enhancing my understanding of Zend Framework 2 & 3
- Assisted in developing an application road map for ibSupply.com with regards to framework upgrading and legacy code refactoring
- Began linking company-desired third-party APIs, including a custom mail transport layer that applied the Mandrill API to select existing transactional e-mail processes with no disruption of other processes

Web Application Developer
April 2016 to September 2016 Medliminal ï¼ Washington , DC

- Worked as part of a team maintaining the most widely used ISP billing, customer relationship, and network management software in the world.
- Troubleshot and resolved web application issues and bugs escalated from customer support and other departments with a 100% success rate.
- Introduced new planning and development paradigms to the company, helping upper management prioritize projects and budget effectively
- Engaged with third-party vendors to develop APIs and third-party software integrations, enhancing the value of our software

Web Specialist
May 2015 to December 2015 Tyler Technologies ï¼ Salt Lake City , UT

- Provided, guidance, UX/UI design and wireframes to a third party developer, bringing the UW Jobs site closer to brand and identity standards
- Conducted full content inventory and information architecture on the HR website, preparing for our move to WordPress
- Worked with all departments to develop a robust and scalable content management strategy going forward.
- Developed prototype themes and applications for the department's migration to WordPress in PHP, HTML, CSS, and jQuery, and maintained software written in Adobe ColdFusion.

Web Designer/Developer

July 2013 to May 2015 General Dynamics ï¼ Norwalk , CA

- Updated and managed existing website properties using the WordPress platform.
- Produced HTML/CSS prototypes for projects with a web component, faithfully implementing the graphic designer's vision
- Worked with a diverse team of creative professionals to meet the client's needs
- Used PHP, HTML, CSS, jQuery, MySQL develop fully functional and interactive WordPress templates and plug-ins in support of Union Marketing campaigns

13F1P - Fire Support Specialist (Airborne)
March 2007 to August 2011 United States Army ï¼ City , STATE

- Planned and executed indirect fire support via artillery, mortars, and close air support
- Personally called upon to maintain and troubleshoot complex tactical database systems for subordinate units
- Trained both United States and Afghan military personnel in field artillery call-for-fire operations
- Optimized return-fire procedure, reducing response time to indirect attacks to an average of 90 seconds while completely mitigating collateral damage

Education and Training
Bachelor of Science : Information Science and Technology , 2016 University of Wisconsin - Milwaukee ï¼ City , State

Coursework in Web Design and Development, Database Design and Administration, Information Architecture, Usability, and Systems Analysis.
Core coursework completed, wrapping up final requirements online.Â
