MAINFRAMES DEVELOPER/QA

Skills

- Functional Testing
- SDLC-Agile,
- SDLC-Waterfall
- Card Domain-Banking and Finance
- ServiceNow
- HP Quality Center(ALM)
- CA Rally
- Selenium Web Driver
- Core Java
- JMeter
- PL SQL
- Smartbear Soap UI
- Putty
- Postman
- Rest Client
- VB scripting
- CA Lisa Virtualization
- Cobol, JCL,
- VSAM, REXX
- DB2, SQL
- Mainframe Z/OS
- Control-M
- IDMS
- FileAid
- Control-M
- SPUFI

Experience

11/2012 to Current
Bickford Senior Living

- Selenium WebDriver, Core Java, COBOL Stored Procedures, SQL, DB2, Oracle DB, SQL Server, HP QC (ALM), CA Rally, CA Lisa, Hadoop , Hive I am currently responsible for the QA deliverables for each project in RC.
- Registered Card is a capability within American Express that automates the current paper/coupon-based offer platform.
- The deployment of this utility shifts the burden of offer fulfillment from the Card member and the Merchant to American Express.
- It provides capability which seamlessly executes marketing campaigns to provide Merchant (SE) discounts to Card Members (CMs) across the entire issuing base.
- The RC proprietary platform automatically matches Card Member transactions against Merchant offers and facilitates offer fulfillment by debiting the Merchant account to offset the CM award.
- Responsibilities:.
- Responsible for setting up new team at offshore as per Syntel's Global Delivery Methodology.
- Prepare End to End Project Plan, Work Breakdown Structure, Test Strategy, Risk Management and Issues Management.
- Manual & Automation Test Lead for Registered card & Digital Offers platform.
- Involved in analysis, development of test cases and automation scripts, test execution, results capturing.
- Coordinate the Manual and Automation QA delivery schedule with Product Owner, Development and support team for all the In-Progress and upcoming changes/enhancements.
- Responsible for coordinating Test process in agile methodology.
- E2E Coordination with interfacing team for E2E Project testing.
- Provide the daily Release testing status of the ongoing testing Projects to business & Product Owners.
- Automating & Execution of Web & API regression test cases using Selenium Web Driver.
- Functional Testing of RC APIs using JMeter, SOAP UI, POSTMAN, Rest Client.
- Strong Experience in UI testing, backend validation, web services.
- Creating virtual services for internal testing without involving all the E2E team support.
- Functional Testing in mainframe environment for COBOL, PL/SQL Store Procedures and DB2 components.
- Running Hive queries in Hadoop Test environment for functional tests.
- Database testing for Databases like DB2, Oracle and MS SQL SERVER.
- Defect tracking for all the issues reported by testing teams (Functional, SIT and UAT, Production Support) and assigning and following up with the correct owners from development to operations, products and SME for clarifications and prioritization.
- Build defect tracking and reporting a daily progress to the senior management.
- Provide support in the account migration and implementation in production with different analysis involving the operations, production support and product owners.
- Improve quality of testing reports to include useful data points in the daily dashboard to introduce transparency.
- Check and guide teams to complete deliverables for all the different projects in the program to achieve 100% success in the audits from

Quality Control and RTC.

- Defect Management using Quality Center and CA Rally coordinate defect triage calls and track defects until closure.
- Coordination with business representatives during the UAT stage and ascertaining business sign off.
- Show & Tell with Client & Business Owners at the end of each sprint for all the testing User Stories.

11/2009 to 11/2012
Mainframes Developer/QA Bickford Senior Living

- COBOL Stored Procedures, SQL, DB2, WinARES+, TCR, RAT House, Part Duex, Sync Balancer, ManageNow, HP Quality Center(ALM) Global New Accounts system core function is to process new applications for American Express Credit cards.
- It is designed to process new applications for US, CANADA, MEXICO, Australia and EMEA (Europe and Middle East Asia) markets.
- The system can process the application in three ways Batch, Online and Instant.
- The main processing involves verifying applications for Fraud Check, Amex Experience Check, and Duplicate Check and other checks, real time/batch Credit Bureau review, scoring, decision, card assignment and creating different downstream files for further processing of application in various downstream systems.
- Also the system tracks the source of the application merchant wise, commission payment, tracking the product performances for future projections.
- Responsibilities:.
- Involved in testing lifecycle from test plan, test scenarios preparation, Test execution and other test deliverables for new functionality & regression of existing functionality.
- Involved in Gathering, analyzing and document user requirements and translate into system requirements.
- Analyzing the impacts on the system for any new requirement.
- Analyzing optimum way to provide best solution before development start.
- Preparation of Design documents based on analysis during analysis phases and spike stories in Agile.
- Coordinate with impacted tech groups and business on implementation activities.
- Implementing functional requirement into programming codes in design phase using programming languages like Mainframe Z/OS, (Cobol) using chgman tools, PLSQL, Core java.
- Performing unit testing once build completed through Cobol, JCL, DB2, IMS, PLSQL, FileAid, BMC utilities, CA tools, PL/1.
- Tools used in development and testing are REXX, EASYTRIEVE, JOB TRAC (Job Scheduler), File-AID, Secured FTP process, IBM utilities.
- Working experiences on databases like DB2, Oracle, MySQL.
- Review the codes developed by team members or new joinees and provide the review comments.
- Review the unit test results and provide the review comments.
- Accumulate the test results and pass it to onshore for further review.
- Covering Front end testing on required basis.
- Covering backend testing on required basis.
- Providing SIT support to downstream and upstream and resolve their defects if any.
- Perform SIT on modules where no downstream involved and load the results in Rally/HP QC.
- Providing SIT sign-off to downstream systems.
- Award/Recognition: Syntel Stretch value award Syntel Adaptive team award.

01/2008 to 01/2017

- 7 years 9months of diversified experience in Quality Assurance, Process Improvement, Test Automation and various phases of SDLC & STLC.
- Enrich experience in STLC components like Functional, Integration, System and Automation testing across Card & payments domain.
- Involved in Requirement Analysis, Test Planning, Test Design, Test execution and Reporting.
- Collaborate with business, operations and product development for a successful implementation of the product.
- Functional API Testing Expertise, including data driven testing.
- Expertise in analysis, coding, testing on Mainframe-Distributed environment.
- Proficient in automating the functional test cases in Selenium.
- Strong analytical and problem solving skills.
- Willingness and ability to quickly adapt to new environments and learn new technologies.
- Domains Knowledge: Cards & Payments, Smart Digital Offers.
- Strong Skills with Z/OS, COBOL, JCL, VSAM, REXX, DB2, Pl/SQL, Stored Proc, IMSDB, IDMS, CICS.
- Extensive worked on Chgman, TSO, File-Manager, FILE-AID, SPUFI, XPEDITOR, QMF, Control-M, JOBTRAC, BMC utilities, SFTP.
- 5.5 years' experience in design and integration of mainframe application solutions with distributed systems.
- Strong Skills with COBOL, JCL, VSAM, DB2, IMSDB, CICS, Pl/SQL, Stored Proc, IMS.
- Working experiences on databases like DB2, Oracle, MS SQL Server.
- Strong Mainframe development experience which includes requirement gathering, technical discussion with Products owner, design finalization, coding (Build), unit testing and scrum testing support.
- Strong experience in project install activities, performing UAT on client request, release support and post implementation validation.
- Also provided production support after project release.
- Working experience on production support tools like Service Now, Manage Now and Infoman.
- 4+ years' experience in functional testing/Manual testing (UI, interfaces, web services) and its Tools HP QC, rally, JMETER, SOAPUI,

Unix.

- 1.5 years of experience in Test Automation using Selenium Web Driver & Java.
- Good Exposure on Requirements Analyzing & Streamlining and Management.
- Good understanding of multi-tier Enterprise Application Architecture and the underlying technology / platform (Java/J2EE, .Net, etc.) and virtualization (e.g.
- VMWare, etc.).
- Actively participate as a scrum team member in all phases of the scrum process from last 2 years.
- Responsible for giving demonstrations and presentation to the management and mentoring other junior team members.
- Expertise in all development phases of Software Development Life cycle.
- Having knowledge of all testing phases including System Integration Testing, User Acceptance Testing, Regression Testing, Performance Testing etc.
- Good Expertise in Banking and Finance Domains.
- Well versed with various Testing Stages/Levels/Phases, Testing Types, Testing Techniques and quality work products.
- Good expertise in peer reviews (Test Design and Defect Reporting), analyzing the results and reporting Suggestions and defects.
- Prepared documentation of the Prescription fulfilment and management module for management review and project presentations.
- Have an experience of handling multiple projects concurrently with a team of more than 15 resources.
- Understanding of code analysis, code conversion and automated testing tools.

Education and Training
Bachelor of Engineering IPS Academy RGTU University i¼ City , State
