NET DEVELOPER

Summary

Seeking an opportunity as a Software Developer with a company whose working environment encourages creativity, empowerment, and teamwork. Highly motivated C# Developer with experience using object oriented design techniques and programming languages, including Microsoft.NET Technologies. Experience in developing web applications using .NET Framework 4.5, C#, ASP.NET, Silverlight, Visual studio 2010/2013, MVC4, JavaScript, jQuery. Having extensive experience in all phases of Software Development Life Cycle (SDLC) including Architecture, Requirement analysis, Design, Development, Implementation, Debugging, Testing, Documentation and Maintenance of Client/Server and web based applications. Experience in creating Validation Controls for front-end validation. Strong Experience in Design & Development of Client-Server & Web applications using Object Oriented Analysis and Design (OOAD) methodologies. Worked in a team environment and also coordinated with business/functional team. Excellent interpersonal and oral/written communication skills. Experienced in the development of database applications using ADO.NET objects. Strong knowledge in designing, developing reports using Dev Express Reports. Experience in creating, maintaining and designing database diagrams, setting table relationships and indexes. Highly analytical team player with a flair for identifying and prioritizing needs/risks in order to optimize solutions. Experience in complex & dynamic presentation layers using HTML, DHTML, XHTML, CSS, Themes, Skins, Master Pages, client side scripting using JavaScript, JQuery and Angular JS.

Highlights

Microsoft Technologies

C#.NET, ASP.NET MVC, Razor, Silverlight 5, ADO.NET, .NET Framework 4.5, LINQ

Web Technologies

WCF Web Services, WCF Data Services, XML, Web service security.

Â Programming Languages

C#.Net, ADO.Net, SQL.

Scripting Languages

JavaScript, jQuery, JSON, AJAX, AngularJS

Databases

MS SQL Server 2008, 2012, 2014.

RAD Tools

Visual Studio.NET 2010/2012/2013/2015

Operating Systems

Windows 98/2000/XP/Vista/Windows 7/8.1/10

Framework

EF 5.0, ASP.NET 4.0.

Design Patterns

SOA, MVVM, MVC, n-tier architecture

Version Control

GitHub, Team Foundation Server

Other Tools

JIRA, Source Tree, ReSharper, Postman, Build Master

Agile development methodologies

Experience

NET Developer Sep 2015 to Current
Cognizant Technology Solutions ï¼ Fort Worth , TX

- Tillster is the global leader in customer engagement programs and self-service ordering for the quick service restaurant and casual dining industries.
- The company provides multi-channel, market-specific digital solutions for ordering, payment, loyalty and lifecycle management that integrate across online, mobile, tablet, kiosk and call center platforms.

- Responsibilities: Involved in Requirements gathering, Conceptual Design, Analysis, and Detail design, Development and System Testing.
- Implement agile scrum methodology in application development.
- Handled ASP.NET features such as Exception Handling, and Custom Error Messages.
- Implemented data access and business logic to meet client requirement Developed core functionality with the ASP.NET MVC Framework (C#.NET, ADO.NET).
- Implementation of client side validations using jQuery, JavaScript and ASP.NET MVC Validation implemented at Controller level.
- Used AngularJS as the development framework to build a single-page application.
- Implemented scheduler to run application on daily/weekly basis.
- Performed unit testing on every new version before sending it for User Acceptance Test (UAT).
- Responsible for deployment of the Application in production and resolving any post-deployment issues.
- Effective team player and excellent communication skills with insight to determine priorities, schedule work and meet critical deadlines.
- Core Technologies: .NET Framework 4.5, Visual Studio 2013/2015, C#.NET, MVC 4.0, Entity Framework Ajax, SQL Server 2014, jQuery, JavaScript, AngularJS Tools: GitHub, Build Master, JIRA, Source Tree, Postman.

NET Developer Feb 2014 to Aug 2015
Cognizant Technology Solutions ï¼ Jacksonville , FL

- IxReveal is the most advanced analytics platform available, enabling analysts to import data in all common file formats analyze text and coded data for actionable intelligence.
- The main advantage is of this platform is to get the information from structured or unstructured data.
- This key element provides the user to retrieve specific info from large amount of documents.
- Responsibilities: Design and develop solutions to complex applications problems related to uReveal Professional Platform- designed to automatically harmonize disparate data sources and reveal emerging trends in any data with dynamic inclusion of Narrative Data as part of Analysis.
- Confer with data processing and project managers to assess limitations and capabilities of existing system and capabilities required for data processing projects and projected work load.
- Developed JavaScript Code for client side validations Extensive experience working in agile development environment.
- Analyzing data processing requirements to plan data processing system that will provide system capabilities required for projected workloads, as well as planning layout and installation of new system or modification of existing system using C#, Silverlight, HTML5 and other third party products.
- Verify stability, interoperability, portability, security, or scalability of system architecture.
- Collaborate with engineers or software developers to select appropriate design solutions or ensure the compatibility of system components using knowledge of relational database modeling and implementation knowledge of SQL Server 2008.
- Evaluate current or emerging technologies to consider factors such as cost, portability, compatibility, or usability.
- Provide technical guidance or support for the development or troubleshooting of systems.
- Provide guidelines for implementing secure systems to customers or installation teams and advice on project costs, design concepts, or design changes.
- Verify stability, interoperability, portability, security, or scalability of system architecture.
- Core Technologies: C#.NET, .NET Framework 4.0, Silverlight 5, MVVM Model, WCF, WPF, SQL Server 2008/2012, VS 2010/2012.

NET Developer Oct 2012 to Jan 2014
Cognizant Technology Solutions ï¼ Long Beach , CA

- Project: DE-ASSIST Modernization (Delaware integrated Eligibility Modernization) Description: DE-ASSIST is a large scale integrated eligibility systems that allows individuals and community based organizations access to screen and apply for a broad range of social service programs provides jointly by the state of Delaware and Federal government.
- Responsibilities: Implemented validation using both java script and inbuilt controls of ASP.Net.
- Created mock up screens during designing phase.
- Used ADO.NET in connecting to Data Access management with SQL Server.
- Experience in Database Analysis/Design/Normalization processes using SQL Server.
- Performed Unit testing according to the test cases for the modules.
- Engage in new Request for Proposals and vendor bidding.
- Apart from that, dealing with client side security architects and business architects for integration of solution with legacy systems.
- Design forward and backward database synchronization to synchronize legacy data, state wide agencies' data with a central statewide data repository.
- Database Design, Development, and Administration using MS SQL Server.
- Involved in analysis, design and development of the application.
- Involved in loading data from XML files to Database.
- Developed web pages using C#, ASP.NET, DevEx controls and VS .NET 2010/2012.
- Used ASP.NET, HTML5, to create dynamic web pages using ASP.NET Web Server Controls.
- Designed and Developed User Interfaces using ASP.NET.
- Responsible for designing and developing ASP.NET web pages using ASP.NET, Java script, ADO.Net, SQL, HTML, CSS and AJAX Web services.
- Added functionality in business layer and Data access layer.
- Designed and developed the C# components for implementing business logic which is used to do the transactions on database in middle tier using ADO.NET.

- Development and Testing of Web Services (A middle tier application on IIS).
- Experienced in Prepare, read, write and understand program specifications.
- Implemented and developed project in agile methodology.
- Used LINQ feature in asp.net pages to avoid database trips.
- Core Technologies: C#.NET, .NET Framework 4.5, Entity Framework 5.0, Data Annotations 4.5, WCF.

Junior .NET Developer Jul 2009 to Aug 2010
Motion Recruitment

- Resource Management Tool was designed and developed to centralize the function of end to end recruitment of the company.
- It offers features like Issue tracking and Project Portfolio management.
- Responsibilities: Understand the project architecture, business functionality and various project roles.
- Responsible for designing GUI, developing business logic using C#.NET, providing security with Windows authentication.
- Followed scrum methodology of agile development with a sprint for 30 days.
- Designed and developed with XML web services and deployed the application into Test and Production Servers, Designed the system in a modular architecture for maximum code reuse, software organization and management of development tasks.
- Experienced in LINQ (Language Integrated Query), LINQ to SQL, LINQ to Objects, LINQ to XML.
- End user ability to customize their views and starting screen.
- Creation of reporting templates with crystal report designer.
- Unit testing and Debugging.
- Environment: ADO.NET, HTML, CSS, JavaScript, DHTML, Visual Studio 2008, SQL Server 2008, Oracle 10g, Web Services, XML, AJAX, .NET Framework 3.0/3.5, WCF, XAML, XHTML.
- 5.

Education
Master of Computer Science May'12 Oklahoma City University GPA: 3.3 3.3
Bachelor of Engineering , Computer Science July'09 Anna University India GPA: 3.6 Computer Science 3.6
Diploma , Computer Engineering Jan'06 Nirma University India GPA: 3.0 Computer Engineering 3.0
Skills
.NET, ASP.Net, C#.NET, ASP.NET 4.0, ADO, agile, AJAX, application development, developing business, call center, excellent communication, Conceptual Design, Controller, crystal report, CSS, client, Version Control, data processing, Databases, Database, Database Analysis/Design, Database Design, Debugging, designing, DHTML, XML, features, government, GUI, HTML, HTML5, IIS, JavaScript, Java script, jQuery, JSON, layout, logic, market, Access, C#, Microsoft Technologies, Windows 7, Windows, 2000, Windows 98, modeling, MVC 4.0, MVC, Operating Systems, Oracle, page, processes, Programming, Proposals, quick, RAD, read, recruitment, relational database, reporting, requirement, Requirements gathering, scrum, Servers, Scripting, software developers, MS SQL Server, SQL, SQL Server, structured, system architecture, team player, troubleshooting, Validation, Vista, Visual Studio, Web Server, web pages, XHTML
