SOFTWARE ENGINEER III

Professional Summary

Expertise in all stages of Software Development Life Cycle (SDLC) including Requirement Analysis, Design, implementation, integration, testing, deployment and post development maintenance of the applications. Working across complex organizational initiatives in the use of technologies process improvements gaining buy-in from high level stakeholders to resolve significant architecture and or process issues. Strong experience in Agile Methodologies (Scrum process) software development, Test Driven Development, Continuous integration. Designing and Implementing Reporting Infrastructure/Data Warehousing (SSIS) to support Data Analytics with Crystal Reports , Tableau and SSRS. Experience in writing complex Stored Procedures,

Core Qualifications

- Administrating Salesforce CRM (Sales and CallCeter)
- Advance knowledge on using .NET Framework
- Expertise in design & implement various custom built solutions using .
- Strong experience in Web Technologies JavaScript, JSON, JQuery, HTML, CSS.
- Expertise in working in service oriented architecture such as creating and consuming XML Web Services over SOAP in .NET using VB.NET or C#.NET.
- Knowledge in XML related technologies: XML, XSLT, XPATH and XML Schema. Net Framework
- 4.0, 3.5, 2.0 and 1.1
- Languages
- PL/SQL, Apex, C#.NET,Â
- Web Technologies
- Force.com, ASP.NET, ASP 3.0, MVC 3, HTML, JQuery Java Script,PHP
- Web Servers
- IIS 7.0, 6.0/5.1/5.0
- Database
- MS SQL Server 2012, 2010, 2008, Oracle 11g/10Q
- Development Tools (IDE)
- MS Visual Studio 2012, 2008, 2005, 2003, Informatica
- Protocols
- TCP/IP, HTTP
- Versioning Tools
- TFS
- XML Technologies
- Reporting Tools
- Tableau , Crystal Reports

Experience

Software Engineer III 03/2008 to 10/2015 Walmart Union City , NJ

- Providing technologies process improvements solution integrating Enterprise Applications and Product development for Service Operations teams.
- collaborate and communicate with all levels of management, internal and external vendors/partners, system integrators Providing analysis, uncover critical business requirements, and facilitate solution delivery, Create and maintain technical documentation for architecture, systems, vendor solutions and strategy for Service Operations Centralized Support team.
- Documented all business processes, use cases and requirements, as well as determine the high-level functional design for each requirement.
- Review test scripts and approve based on business process knowledge and use cases.
- Configure the application and prepare/modify the templates as and when necessary.
- Developed against SQL Server, creating tables and stored procedures to support the MitchellU (LMS) application and Customer Portal at Mitchell.com/Support Developed against Oracle using PL/SQL, creating tables and stored procedures to support the Data Analytics with Tableau and Crystal Reports.
- Developed JustInTime implementation support case system using Oracle, MS SQL, SalesForce API and IVR.
- Developed RoboCall Collection system to place auto call to customers and log against Salesforce CRM Account logs.
- Built a custom deployment tool/script that remotely communicates with and removes servers from a F5 load balancer in order to support zero downtime rolling deployments.
- Developed and maintained a full suite of unit tests using MS SQL 2005.
- Constantly upgraded supporting libraries and frameworks; including the upgrades to .Net 4.0, IIS 7.5, SQL Server 2012.
- Also upgrade the application to run on 64bit architecture.
- Worked with the executive and product team to plan the 12 month roadmaps.
- Retrained the team to effectively use agile processes and methodologies to help streamline development from inception to release.
- Implemented paired programming and code/architecture review to better spread the knowledge of all parts of the application throughout the team.

Software Business Developer II 01/2003 to 01/2008 Robert Bosch Tool Corporation Fairport , NY

- Worked as part of a team to design, develop and maintain web DYI application including a number of supporting web services written in

.Net (C# and VB.NET) and Java.

- Utilized extensive knowledge in caching, load balancing and code optimizations needed to support the ~20 million page views per month.
- Followed agile methodologies to estimate both complexity and value and quickly produce features for the consumer.
- Developed and Support Finance Subscriptions based system and CRM system.
- Used HTML/JavaScript/CSS extensively to build an intuitive, aesthetically pleasing website.

Software Business Developer 01/1998 to 01/2003 Anacomp Inc City , STATE

- Worked as part of a team to design, develop, and maintain Enterprise Finance and HR applications.

Software Engineer 01/1996 to 01/1998 Epicor Corp City , STATE

- Designed, developed, implemented ERP system.
