PERIOD

Summary

Senior QA/Test Analyst with Tata Consultancy Services Limited since 5 years and 9 months where I have worked with US client in Retail business domain. CVS RxConnect is drug dispensing software system, enabling a pharmacy to fulfil the needs of prescription filling and drug dispensing activities. It is based on the Onsite and Offshore model. Â This system permits distribution of the prescription filling activities, enabling the pharmacy to complete the process in a shorter period of time. The system scales, supporting a single retail pharmacy up through an enterprise organization consisting of multiple pharmacies dispersed across a large geographically area. Through all the learning experiences I have gained expertise in following areas: Â To work in various SDLC life cycle Interacting with client and different team for requirement gathering and analysis.Preparing Test Plans, TCDR Plans for Projects, BSR's.Effort Estimations, review of Business Requirement Creation, Execution of Test cases Have knowledge on PL/Experienced in functional, negative, regression, system integration (SIT), acceptance (UAT) testing, replication activity on maintenance builds Testing software programs to compare to specifications and documentation.Identifying, analyzing defects, questionable functions, errors, program functionality, outputs, online screens, and content. Creation of test status reports

Accomplishments

Certifications : Oracle DB Certification

Â ISTQB Foundation Level Certification

Â Mercury HP QC Certification

Â ISTQB Advance Level Test Manager Certification

Experience

Period

December 2009 to February 2010 Bickford Senior Living
