IT CYBER SECURITY SPECIALIST/ANALYSIS

Summary

My name is Christopher Rogers (Chris) is what I go by, I am an extremely passionate well-educated individual that is always thinking in a positive manner, where ever I go. I bring an open, kind, honest and positive attitude with me. I am well educated in the 21st-century technology, cybersecurity, and programming, with only two classes till I graduate the bachelor's degree program in Computer Science with concentrations in Software Engineer, Programming, and Ethical Hacking. I am continuously studying, reading, and following through educating myself on new innovative and creative ideas as well as stating in-line with the newest advances in IT Information. I am starting the master's program in Cyber Security with concentrations in Ethical Hacking, Security Data Analytics and Big Data at the UMBC in Spring 2018, I am also scheduled to take the CompTIA+, Network+, Security+, and the MDSC in November 2017 through May 2018. I am looking to obtain a full-time employment position with a Technological company that is looking for a reliable and responsible individual that has my background and actual extensive experience in communicating with clients, on estimating, contracts, billing, and directing over 50 employees while running family my businesses from 1989 to date (when needed or working in the middle of disaster situations), this is education that one gets while maintaining the functionality of a structured business directly making those decisions that so many rely on in real time while communicating with many others (clients, employees, other companies, banking, and budget, etc.). While my enthusiasm, friendliness, and people person spirt helps me connect and communicate with clients, shareholders, policymakers and coworkers in a timely manner, honest, open and direct, maintaining a positive high energy spirited personality. My communication skills come to me naturally, I have used my friendly attitude on many occasions to straighten out situations (projects) that were starting to go off course. Having these skills, being able to apply communication skills, leadership skills, a friendly positive attitude go a long way in benefiting any work in progress, especially in a team orientated atmospheres. However, I can start on any task or project as directed based on my working skills, the project, and my hiring date. Unique ability to solve problems and come up with solutions under unusually fast pace and pressured circumstances (I study and registry training in solving major issues either temperately or permanently in emergency situations I specialize in infrastructure, residential and commercial structures, IT Cyber Systems disaster recovery services with back-ups on and off-site. See FEMA certificates

- 24 hours a day Volunteering Work: Unites States Presidential Detail.

Education and Training
Master of Computer Science : Programming , Present University of Phoenix i¼ City , State Programming 3.65
Personal Information
IT Disaster recovery & Contingency plan Summary: Chris Rogers again, thanks for reading my resume and cover page, again I am currently in college with a few classes remaining before I graduate my bachelors, which I am working on in Computer Science, this will be complete by November 2017. Starting in Spring 2018, I start the Graduate program getting a, master's degree in Cyber Security at the University of Maryland Baltimore Campus (UMBC), while I have been furthering my education online. This keeps my skills sharp and up to date on current and new technology. I am also in scheduled to attend a Hacker Computer Software Boot Camp in January of 2018, which is a 12-week program that adds 800 plus hours of hands on real time computer software and programming ethical hacking (offense/defense) in real life situations. Currently I am working through Microsoft's certified classes in their business applications and online student resources center to obtain a MCDE along with other certificates as I continue working through all the resources on Microsoft Education platform, EDx (MIT, Harvard, Berkley, Cornel joined platform),EDx is exceptional in learning through the platform these Ivy-League colleges put together with the actual classes one would take in they were to attend the actual college makes EDx standout from all other online platforms, other platforms offer a great range of information especially up to date technologies. Wrapping up I would again like to point out that I am a real hard worker, I do really enjoy working with computers, servers, networks, testing, and security, learning new things daily is what I live for. This is me with my outgoing personality to everything, my outgoing positive attitude, my critical thinking beliefs with continuous studying, and my creative intuitive problem-solving abilities are very beneficial to companies that are always looking for people that function on these higher hyper levels. These traits that or in certain people, these people usually communicate well with all people while they strive to work within team or group settings and work well alone if need be. I really seem to complete any atmosphere that I attend. I am the most reliable individual that I know, as I have been complimented about my dependability, availability, and my work ethics my entire life. I have several vehicles so rain, snow, or shine transportation is no problem here. Please give me a call and see for yourself who Christopher Rogers is. Sincerely, Christopher Rogers Computer Support Specialists and Systems Administrators
